

# Food Processing Industry - Solutions Forum

Friday 26 September

1:00 - 5:30pm

National Centre for Synchrotron Science  
800 Blackburn Road, Clayton.

## Water and Wastewater Management

Minimising water use, water recycling and trade waste reduction are big challenges for the food processing industry according to local companies who attended the *Food Industry Roundtable on Water Management* on 23 July.

Our *Solutions Forum* responds directly to this feedback - with practical information and advice from experts in industry, research and government - addressing the key issues and providing solutions, ideas and options for food processors.

## Presentations:

- *Water supply quality management*  
Asoka Jayaratne, Yarra Valley Water
- *Trade waste management*  
Wes Douglass, City West Water
- *Radford Meats – case study in water recycling*  
Eduardo Rivera, Waterwerx
- *Pilot scale facilities for water recycling*  
Kirthi De Silva, CSIRO
- *Stormwater filtration & harvesting*  
Jim Tanner, ENVISS
- *Advances in water treatment technologies*  
Anthony Gibson, ORICA
- *Low energy technologies for water treatment*  
Gayani Chandrasena, Monash University
- *Bio-surfactants for odour control*  
Andrew Proud, Global Future Solutions
- *Shedding light on sustainability issues*  
Dr David Cookson, Australian Synchrotron
- *Extracting valuable compounds from waste*  
Prof Milton Hearn, Monash University
- *Vic Govt support for innovation & technology*  
Gary Lowe, DSDBI

## Enquiries and Registration

This is a free event, *but you must reserve a place.*

**RSVP by Tues 23 September**

**Shankar Kumarasamy**

03 9905 0695

0427 924 529

shankar.cumarasamy@vcscm.org

**Gary Lowe**

03 9938 0113

gary.lowe@dsdbi.vic.gov.au

## Networking Session:

Presentations will be followed by drinks and networking from 4:30 - 5:30pm.
